DETECT THE DWELLERS · CHAPTER DICE TEST

Match exact numbers on standard d6s. A fresh feed every shift, then the boss. 1–4 players.

YOU NEED

This sheet's cards. **Standard d6s in four colours:** crew dice (3 per player), 1 in a second colour for the solo crew die, 2 amber dice for the row, and about **16 threat dice** to set under the alarm cards. Coins for HP, comebacks and the shift tracker.

SETUP

1. Pick the shift. **Quick:** everyone starts at **9 HP**. **Full: 10 HP**, and the bosses' **Full Shift** lines play. Each player picks an analyst.
2. The **situation deck** is the 15 alarms and 18 situations. Set the 9 **story** situations aside and shuffle the rest. **Quick:** deal 8. **Full:** deal 11, add 3 story cards, shuffle the 14. That's the **feed**.
3. Shuffle the 3 bosses and put one face down under the feed. Set the 3 conditions aside.
4. Shuffle the 16 items: the item deck. The crew draws 2 (Quick solo: 1).
5. Set out the shift tracker: a coin on a box marks anything used once a round or once a fight.

THREAT DICE

When an alarm arrives, set threat dice **just below its card**, turned to the numbers printed along its bottom edge. **4 players:** add the card's **+** die (a 6).

Card ⚀ ⚁ ⚂ ⚃ + ⚅ per player past 3

A FLIP

1. Pick who's on point. They stay on point through any situations until the next fight ends.
2. Flip the top card of the feed. A **situation**: play it, then flip again.
3. An **alarm**: set its dice. On point may **baseline it** (below). If anything is on the row, roll the row: every row alarm that comes back returns with its printed dice, and the two with the highest Damage hit everyone on the way in. Two or more in play: a **multi-alarm** fight.
4. Fight. When the feed is empty, turn the boss up: it arrives with one last row roll and no arrival hits. **Full Shift:** its card says when it pulls the row (comebacks hit on arrival and join the fight).

THE ROW

Roll the **2 amber dice** and add them. A row alarm comes back if the sum is **at most its number** ("back on 2–5" comes back on 5 or less). The first time an alarm comes back, put a coin on it. It stays.

BASELINE IT

A newly flipped alarm with a **Baseline** line (never a comeback) can be baselined: set the 3 dice on that line too. Beat it with them all and the agents have learned it: slide it under an agent someone holds, so only its blue **tuck band** shows below. That agent gains the band's trait (**Twin**, **Ghost**, **Scramble** or **Repair**), so pick the agent with care. Tucked, the alarm is **off the row**. Discard that agent and the alarm goes back on the row. No agents: set it aside until one is drawn.

A FIGHT ROUND

1. **Row.** From the second round on, roll the row first.
2. **Roll.** Everyone rolls one crew die. On point rolls two. Solo: two of your own dice plus the crew die (second colour). Each Triage Agent: its holder rolls one more of their own dice. **Once a round, each player may reroll one of their own dice** before using it.
3. **Match.** A die takes out one threat die showing **exactly** its number: a ⚄ takes a ⚄. Turn the taken die aside.
4. **Hits back.** Every alarm with dice left hits everyone who isn't blocking, for its Damage. An alarm with no dice left is beaten.

DOUBLES

Your analyst card shows your doubles. The solo crew die: **only a 6**. A double **counts as two dice showing its number**: a Hunter's ⚄ takes two ⚄s, under one alarm or two. **Or** it guards: you or anyone you choose blocks this round. Never both. **Pairs:** two of your own dice showing the same number make a double too.

AFTER A FIGHT

Beaten alarms go back on the row, **every time**, unless they were baselined. Draw 2 items (1 solo) and decide who takes each. **Agents** are passive and work for the whole crew. Each player holds 2 (the Soarcerer 3; solo 4). Full? Discard one to take another. **Consumables** don't take a slot: keep them in hand and use each once.

SITUATIONS AND CONDITIONS

Most situations make you choose: stay or run, grab it or leave it. On point rolls any grab with spare dice. Conditions are cards you keep in front of you. **Rattled** and **Exposed** wear off; **Focused** waits until you use it. Nobody holds two of the same.

WIN OR LOSE

Beat the boss and you've survived the night. Anyone at 0 HP and the shift is lost.

Prototype only. Numbers from the bot sim of 2026-11-02: situations shuffled into the feed, agent traits (prototypes/chapter-dice/README.md). Record: who played, time, win or loss, and every rule you played wrong.
