DETECT THE DWELLERS · CHAPTER DICE TEST

A paper test of one idea: **match exact numbers instead of adding them up.** Then play today's Quick Shift with the same group and compare. Tuned for **2 players**; 1–4 play the same rules.

YOU NEED

This sheet's cards. **Standard d6s in four colours:** crew dice (2 per player), 3 in a second colour for the solo crew die and agent dice, 2 amber dice for the row, and about **14 threat dice** to set under the mob cards. Coins for HP and to mark mobs that came back.

SETUP

1. Each player picks an analyst. Start at **21 HP**.
2. Shuffle the six mobs face down. The Lockjaw Syndicate goes underneath.
3. Shuffle the 6 situations face down. Set the 3 conditions aside.
4. Shuffle the 8 agent cards: that's the kit deck. The crew starts with 2 agents (1 solo).

THREAT DICE

When a mob arrives, set threat dice **just below its card**, turned to the numbers printed along its bottom edge. Those dice are its hits. Each mob's numbers bunch round one main number, so a double on that number goes a long way. **4 players:** add the card's **+** die (a 6). Solo to 3 players use the printed dice.

Card ⚀ ⚁ ⚂ ⚃ + ⚅ per player past 3

1–3 players set ⚀ ⚁ ⚂ ⚃ · 4 players ⚀ ⚁ ⚂ ⚃ ⚅

A FLIP

1. Pick who's on point. From the second flip on, flip a **situation** first and play it.
2. Flip the top mob and set its dice. If anything is on the row, roll the row: every row mob that comes back returns with all its dice. The two with the highest Damage hit everyone on the way in.
3. Fight. When the feed is empty, the boss arrives with one last row roll and no arrival hits.

THE ROW

Roll the **2 amber dice** and add them. A row mob comes back if the sum is **at most its number** ("back on 2–5" comes back on 5 or less). The first time a mob comes back, put a coin on it. It stays.

A FIGHT ROUND

1. **Row.** From the second round on, roll the row first.
2. **Roll.** Everyone rolls one crew die. On point rolls two. Solo: two of your own dice plus the crew die (second colour). Each running Triage Agent rolls an agent die (second colour), set under its card. **Once a round, each player may reroll one of their own dice** before using it.
3. **Match.** A die takes out one threat die showing **exactly** its number: a ⚄ takes a ⚄. Turn the taken die aside.
4. **Hits back.** Every mob with dice left hits everyone who isn't blocking, for its Damage. A mob with no dice left is beaten.

DOUBLES

Your analyst card shows your doubles. Every other die (the solo crew die, agent dice): **only a 6**. A double **counts as two dice showing its number**: a Hunter's ⚂ takes two ⚂s, under one mob or two. **Or** it guards: you block this round. Never both. Agent dice can't guard or hit the boss.

AFTER A FIGHT

Beaten mobs go back on the row, **every time**: nothing removes them for good. Draw 2 agent cards (1 solo) into the tray, which holds 5. Run an agent every round, or burn it once for its big effect. A die turned by Enrichment keeps what it was: a double stays a double.

SITUATIONS AND CONDITIONS

Most situations make you choose: stay or run, grab it or leave it. On point rolls any grab with spare dice. Conditions are cards you keep in front of you. **Rattled** and **Exposed** wear off; **Focused** waits until you use it. Nobody holds two of the same.

WIN OR LOSE

Beat the boss and you've survived the night. Anyone at 0 HP and the shift is lost.

Prototype only. Numbers from the bot sim of 2026-10-30, exact numbers with situations (prototypes/chapter-dice/README.md). Record: who played, time, win or loss, and every rule you played wrong.
